^{**} All IPL treatments will be performed at Clear Advantage office located within Eyesight.

IPL PRE-TREATMENT

ONE MONTH PRIOR

- Avoid Sunbathing, tanning beds and self-tanners
- Wear sun protection SPF30+

ONE WEEK PRIOR

- Avoid the use of photosensitizing medications such as any topical Retinoids (Accutane), products that contain Benzoyl Peroxide (found in many forms of cleaners, lotions, creams, gels, and toner- like solutions) products that contain retinol moisturizers
- Avoid taking oral **Doxycycline** or **Tetracycline**, check with your prescribing doctor prior to discontinuing any medication

ONE DAY PRIOR

- If you have a history of Herpes Simplex virus infection, you may consider taking an antiviral medication as prescribed by your doctor.
- Shave the areas to be treated
- If there is very little hair in the area, please shave and take small amount of hair to a piece of paper for your provider to review.

DAY OF TREATMENT

- Inform your doctor if you have changed medications or have had recent sun exposure
- Avoid smoking cigarettes as this may constrict the vessels and make treatment less successful
- Do not exercise or go to the gym, spa or sauna immediately before treatment
- Do not wear sunblock or makeup

AFTER IPL TREATMENT

IMMEDIATELY AFTER TREATMENT

 After intense pulsed light (IPL) treatment apply sunscreen (SPF 30+) to all areas treated and avoid sun exposure

DAY OF TREATMENT

- Avoid Saunas, strenuous exercise and any activity that may cause excessive heat to the treatment area for 24 hours.
- A feeling of itchiness may be noticed; this is perfectly natural. Do not scrub or scratch the treated areas.
- Apply a moisturizer to the treated area.
- Do not apply products that may cause your skin to react negatively. Do not use peels or aggressive cleansers for 1-2 weeks.
- If possible, avoid using makeup (other than sunscreen and moisturizer) for 4-8 hours after treatment

- Note: Treated pigment may become darker following the treatment, this is a desired effect and may be covered by make-up.
- Inform your doctor immediately if there is continued or severe discomfort or any sign of blistering. This is extremely uncommon, but it required immediate attention.

PIGMENT TREATMENTS

• The treated pigment may slough as the skin renews (7-21+ days). Do not scratch or pick at the areas.

VASCULAR TREATMENTS

- Slight redness and itchiness are common for a few minutes to a few hours after the treatments.
- Dry skin or peeling may be noted after the treatments (apply moisturizer)
- Nd: YAG treatments of small vessels may have erythema (redness) lasting a few days.
- Most vessels require multiple treatments, and new visible vessels may form over time.

WEEK 1 AND 2 POST TREATMENT

 Avoid direct sun if possible but if you cannot avoid direct sun exposure, always use sunscreen (30 SPF+) and reapply every 2 hours.

CONTACT INFORMATION

Your technician is frequently assisting other patients within the ocular surface clinic.

If you have a question, or would like to move your scheduled appointment, please contact Rebecca at 603-501-5000 and leave a message with the staff at Clear Advantage.

IPL PROCEDURE FEE

IPL(4 treatments) with TearCare (1 treatment) Discounted package price with TearCare	\$ 2,250.00	
IPL (Each IPL treatment, paid separately)	\$ 525.00	
TearCare (separately)	\$ 695.00	

PAYMENT IS DUE ON THE DAY OF YOUR PROCEDURE. DISCOUNTS ARE AVAILABLE IF PAID IN ADVANCE.

Payment Options:

Please complete the following pages and bring this with you for your FIRST APPOINTMENT

•	I authorize <u>DR. LAUREN MCLOUGHLIN</u> to perform IPL [™] treatments on me in an effort to improve Dry Eye Disease due to Meibomian Gland Dysfunction / Dyschromia / Hyperpigmentation / Hair Reduction / PWS / Haemangioma / Angioma / Rosacea / Telangiectasia / Other:	<u>Initials</u>
•	I understand that without eye protection, IPL applied near the eyes may cause severe ocular complications	
•	I understand that there is a rare possibility of side effects or serious complications including permanent discoloration and scarring. I am aware that careful adherence to all advised instructions will help reduce this possibility	
•	 I understand the below list of short-term effects and agree to follow matching guidelines: Flaking of pigmented lesions – crusts may take 5 to 10 days to disappear and it is important not to manipulate or pick which may otherwise lead to scarring Discomfort – during the procedure, I might experience a sensation similar to a rubber band snap which degree will vary per my skin condition and area sensitivity but that does not last long. A mild "sun-burn" sensation may follow for typically up to one hour and will be reduced with application of cooling and soothing creams Reddening and swelling – severity and duration depend on the intensity of the treatment and the sensitivity of the area to be treated. These phenomena may be reduced with application of cooling and/or anti-inflammatory creams Bruising may rarely occur and may last up to 2 weeks 	
•	I understand that sun exposure or tanning of any sort is not aligned with the pre and/or post-care instructions and may increase the chance for complications	
•	The procedure as well as potential benefits and risks have been thoroughly explained to me and I have had all my related questions answered	
•	Pre and post-care instructions have been discussed and are completely clear to me	
•	I understand that results may vary with each individual and acknowledge that it is impossible to predict how I will respond to the treatment and how many sessions will be required	
•	I consent to photographs being taken for the purpose of documenting my progress and response to the treatment and be kept solely in my medical record	
•	I consent to photographs being used for medical education or publication with applied discretion and not revealing my identity	

Please complete the following IPL[™] pre-treatment compliance checklist to ensure your information is accurate and updated

For Dry Eye Disease due to Meibomian Gland Dysfunction:

	Skin type of the area to be treated: I \Box II \Box III \Box IV	√ □ V	
	Ocular surgery or eyelid surgery, within 6 months prior to the first IPL session?	NO	YES
	Neuro-paralysis in the planned treatment area, within 6 months prior to the first IPL session?	NO	YES
	Uncontrolled eye disorders affecting the ocular surface, for example active allergies ?	NO	YES
	Pre-cancerous lesions, skin cancer or pigmented lesions in the planned treatment area?	NO	YES
	Uncontrolled infections or uncontrolled immunosuppressive Diseases ?	NO	YES
	Ocular infections, within 6 months prior to the first IPL session?	NO	YES
PTILIGHT	Prior history of cold sores or rashes in the perioral area or in the planned treatment area that could be stimulated by light at a wavelength of 560 nm to 1200 nm, including: Herpes simplex 1 & 2, Systemic Lupus erythematosus, and porphyria?	NO	YES
	Within 3 months prior to the first IPL session, use of photosensitive medication and/or herbs that may cause sensitivity to 560-1200 nm light exposure, including: Isotretinoin, Tetracycline, Doxycycline, and St. John's Wort?	NO	YES
	Radiation therapy to the head or neck, within 12 months prior to the first IPL session?	NO	YES
	Planned radiation therapy, within 8 weeks after the last IPL session	NO	YES
	Treatment with chemotherapeutic agent, within 8 weeks prior to the first IPL session?	NO	YES
	Planned chemotherapy, within 8 weeks after the last IPL session?	NO	YES
	History of migraines, seizures or epilepsy?	NO	YES
	Tattoos in the planned treatment area ?	NO	YES
	Exposure to sun or artificial tanning during 3-4 weeks prior to Treatment?	NO	YES
	Any remaining suntan, sunburn or artificial tanning products?	NO	YES

For all other conditions (relevant for an upgraded configuration of the OptiLight device):

	Skin type of the area to be treated: I \(\sim \) II \(\sim \) III \(\sim \) IV	/ 🗆	V □	VI 🗆
HR PL SR VL	Natural or artificial sun exposure in the past 3-4 weeks pre-op or the following 3-4 weeks post-op plan	NO	YES	
	Use of self–tanners or tan enhancer caps within the past 3-4 weeks pre-op plan	NO	YES	
	Photosensitive herbal preparations (St John's Wort, Ginkgo Biloba, etc) or aromatherapy (essential oils)	NO	YES:	Explain
	Diseases which may be stimulated by light at 400 nm to 1200 nm, such as history of Systemic Lupus Erythematosus or Porphyria	NO	YES:	Explain
	Pregnant or possibility of pregnancy, postpartum or nursing	NO	YES	
	Inflammatory skin conditions (dermatitis, etc)	NO	YES:	Explain
	Presence or history of active cold sores or herpes simplex virus	NO	YES	
	HIV	NO	YES	
	Active cancer (currently on chemotherapy or radiation)	NO	YES	
	Previous skin cancer?	NO	YES	
	Medical history of keloids	NO	YES	
	Intake of isotretinoin within the past year	NO	YES	
	Medical history of Koebnerizing isomorphic diseases (vitiligo, psoriasis)	NO	YES:	Explain
	Any known allergy?	NO	YES:	Explain
	Any tattoo and/or pigmented lesion on requested treatment area that should be protected?	NO	YES	
	List of additional current medication taken			
HR	Hormonal or endocrine disorders (PCOS or uncontrolled diabetes?)	NO	YES:	Explain
	Previous hair removal procedures on requested treatment area (other IPL/laser, wax, electrolysis, etc)	NO	YES:	Explain
PL S R	Any observed modification (color, size, texture and border) on the lesion to be treated?	NO	YES:	
	Any hair on requested treatment area that should not be removed?	NO	YES	
VL	Age of lesion onset?	Age		_
PL SR	Previous skin procedures on requested treatment area (Botox, fillers, peels, etc)	NO	YES:	Explain
S	Intake of aspirin or anti-coagulants?	NO	YES:	Explain
R VL	Easy bruising?	NO	YES
